

# LSC LX900

**LSC LX900 - the all new LSC LX-Console – Lighting made clear.  
Refined in thousands of shows, driven by Clarity software.**

The **LX-series** is split in three different sizes to scale every type of show or venue and provide the operator and lighting designer a clean ergonomic work environment where everything is only a push of a button away.

With the Clarity software you can easily control every type of light, like PAR cans, LEDs or moving lights, colour scrollers, LED matrix walls and even Media Servers using an intuitive interface.

The **LX900** is the flagship of the LX range, with the **LX900** every dream comes true.
