

LSC VX WINGS

LSC VX Wings – the Wings of VX series have been invented to allow direct control of the Clarity software features.

Providing a bridge between the computer world of mouse control and the traditional dedicated lighting control console, the **VX series** draw on the best of both worlds and are available in 2 different models.

Connected directly to the Mac® or Windows® PC via USB cable, the **VX Wings** offer direct control of intensity and playbacks via buttons and faders.

Please note that the **VX Wings** will not work with the Demo Version of Clarity.
